

SDPB is science. Along with critically acclaimed science programming on TV and Radio:

- We partner with the Sanford Lab at Homestake to share information about the work being done at the lab.
- With Science Cafes, we bring science experts to free public events to help people of all ages learn more, firsthand, about science and nature.
- SDPB produces documentaries, like *The Badlands: Nature's Time Capsule*, to highlight the geographical and geological science and history unique to South Dakota.

SDPB is history. We preserve the stories of each generation.

- *Homefront: South Dakota* recorded the memories of the WWII generation and put them online for everyone to access.
- *Deadwood Songbook* told the story of the early gold miners and the music and culture they brought to the Black Hills.
- *Active Duty* gives unique access to South Dakota National Guard units serving in harm's way in Afghanistan.
- Documentaries like the history of SD high school football and girls and boys basketball tell our unique stories.

SDPB is the arts. SDPB's on-air and online network gives ALL South Dakotans cost-effective access to our finest indigenous and visiting performing artists, regardless of means or geographic location.

SDPB captures and distributes the music of South Dakota's top musicians (SD Symphony, Black Hills Symphony), and gives free, on-demand access to top visiting musicians, like *The Dakota Sky Piano Festival* featuring up-and-coming world-class pianists.

- SDPB airs All-State Chorus & Orchestra, All-State Band, All-State Jazz Band and the Elementary Honor Choir to a statewide audience yearly.
- We give opportunities to young and old to experience classical, jazz, world, folk music, and other musical genres that do not receive widespread attention in the commercial world.
- The voices of South Dakota are highlighted in specials like *Red Willow Band: Reunion* and in series like *No Cover, No Minimum*.

SDPB Is South Dakota
